

## **Diabetes Prevention Management Program**

We were notified on August 17<sup>th</sup> that this program is ending as of December 31, 2021. Priority Health does not have all of the material on the new option at the time of this board meeting.

The new program will be through Omada.

They will all be Zoom classes that members will need to watch.

We don't know the pricing of the new program.

We don't know if we can add wellness rewards like we had on the current program at \$50.00 per completed task which paid a max of \$250.00 per subscriber.

We do know that the member will have more requirements with this new program than they had on the last program.

Because this current program is ending, and we feel like a new program is a worthy benefit to the plan for the subscribers. If the replacement plan comes in at around the same cost, we recommend a resolution to replace at the end of the year.

Staff will work with the consultants and Priority Health to determine if a reward program can be added.
